Our web developers are capable of full cycle project leadership including application architecture, design input, site layout/user interface, database design/programming and experienced in content management systems (Joomla and WordPress) This is a full-time position with comprehensive benefits including health insurance coverage and professional development allowance.

## Duties and Responsibilities

- Design and develop websites ensuring strong optimization and functionality
- Assist in the planning of overall company policies regarding search engine optimization and web development
- Work on projects including: creation and development of websites (static and CMS based WordPress), web layout enhancements and web-based applications
- Code web pages utilizing CSS, XHTML and programming languages including JavaScript, SQL and PHP
- Ability to work with several accounts at once and maintaining a positive client relationship
- Maintaining budgets, both financial and time-related
- Competent, positive individual with the ability to work independently and as a team

## Requirements and Qualifications

- 2+ years of web development
- Familiarity and strong experience with CMS platforms, specifically WordPress
- Solid programming skills: HTML5, CSS, SASS, PHP, Javascript, jQuery, Git for version control
- Facebook, YouTube, and Twitter API integration and application development experience
- Optimizing for performance/speed
- Cross browser/device testing
- Debugging in general
- Skilled in SEO coding principals
- Exceptional Adobe CS skills (Photoshop and Illustrator)
- Solid communication skills (verbal/written) and thereby the ability to present concepts/lobby for good ideas
- Strong organization skills to manage multiple timelines and complete tasks quickly within the constraints of clients' timelines and budgets.
- Desire to stay current on all programming-related technology trends and innovations, keeping the agency on the leading edge of interactive design
